DETAILED ACTION

1. Claim 5 stands rejected under 35 U.S.C. 102(b) as being clearly anticipated by Christopher (4,731,851).

Christopher discloses in figure 6 a decibel level adjustment device including a plurality of signal lines (503,504,506,508), at least one switch means (510,512,514), a switch control circuit means (518,C0,C1) and an adder circuit means (516) as claimed.

2. Applicant's arguments filed on 09/14/2004 have been fully considered but they are not persuasive because figure 6 of Christopher does show the elements 504,506 and 508 providing a plurality of parallel signal lines that are shifted a number of bit as claimed. Note: elements 504,506 and 508 are hard-wired bit shift arrangements (see col. 9, lines 12-14).

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2124

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
